

Come and discover the IT Six Family!

IT Six Global Services, the largest software company in Oltenia, is extending its team and is looking for a **UX DESIGNER**

User Experience Designer

User experience design currently involves:

- Designing icons, user input controls, navigation controls, and other common software and web application user interface elements.
- Delivering screen mockups showing the visual design of our applications.
- Delivering wireframe mockups that show how the user will interact with our applications.
- Designing the organization and accessibility of data within our applications.
- Contributing to discussions about visual and interaction design.
- Contributing to our internal body of knowledge on user experience design by being an active member of shared communication forums such as our internal wiki.
- Keen sense of user experience (UE) design principles – what works technically, aesthetically and is intuitive to the end-user
- Up-to-date on web page design trends in the industry
- Good communication skills, attention to detail and experience working with end-users (for example, during requirements gathering, user acceptance testing (UAT) sessions, etc.)
- HTML, DHTML, CSS, Javascript
- Exposure to AJAX desirable
- Should be able to demonstrate previous work

General skills:

- Independently motivated.
- Proven track record of innovative design.
- Strong ability to gather requirements and use internal resources for feedback.
- Excellent team player with strong verbal and written communication skills.

Qualifications:

- Bachelors degree in a related field.
- A portfolio. We are mostly in your ability to design icons for software and web applications.
- 3 years of professional design experience.
- Excellent English skills

Technical Skills:

- Adobe family of design products (Photoshop, Illustrator, etc...).
- Microsoft Office (Visio, Word, Excel, Outlook, etc...).
- Publishing design documentation on the web such as text, images, links and documents.
